**accessbahn**  
the fastlane to your remote software needs

### *What We Do*

accessbahn gives you the freedom and ability to access your desktop remotely, via the internet, for an affordable subscription fee. By running on our secure servers, your applications behave exactly as if they were running on your own computer.

accessbahn can provide your company with a turnkey solution to all online computing needs (including Outlook, Windows 2000 and Microsoft Office Standard Suite) that is fully scalable!

### *Why accessbahn? the benefits are unrivalled...*

- **there is no software to purchase, hardware investment or IT downtime**
- **no need to network or configure your computers**
- **eliminate the risks and costs associated with maintaining and upgrading IT infrastructure**
- **security - accessbahn protects our client information. We accomplish this by taking three critical aspects into consideration:**

confidentiality - prohibits access to those lacking authorization

availability - ensures that resources will not be deleted or be made inaccessible

integrity - ensures that information cannot be modified in unexpected ways.

- **live access to in-house IT experts 24/7**
- **instant virtual network - build a virtual private network for all of your employees in an instant while offering you total control of your activities.**
