RECOMMENDATION LETTER / Mr. Konstantine Haralampopoulos

To Whom It May Concern:

This letter is my professional recommendation for Mr. Konstantine Haralampopoulos.

Acting as Managing Director of Medevien SA, I can attest from a first hand basis that Konstantine has made a significant positive difference since his involvement to our organization.

I have found him to be professional and hard working while consistently delivering results, best practices and strategic acumen.

I first met Konstantine as Medevien was in the process of searching for its first medical screening kits to bring to market. Serving in the capacity of VP of Marketing, Sales and Business Development for his employer, I quickly realized that Konstantine possessed a broad range of business expertise as well as personality traits which Medevien could greatly benefit from such as his Greek background and international exposure as well as his work experience and drive to succeed.

Working as an outside consultant for Medevien, he has successfully undertaken the following objectives, among others:

- Contributed to the business plan and timeline of Medevien's product roll-out
- Led the business development initiative to search for suitable medical screening tests for Medevien to launch
- Met with and negotiated terms with vendors
- Assisted in the brand development and identity of chosen screening products
- Undertook analysis to determine future areas of growth and expansion such as new markets and distribution channels.

I highly recommend Konstantine to companies which are in need of talented individuals who are able to effectively work in the European and North American cultures concurrently.

Feel free to contact me personally if I can provide any other information to you.

Sincerely,

Nicole Fliskanopoulou

Managing Director
MEDEVIIEN SA
